Reputation Ramp Up

Review generation, monitoring, and marketing in one program.

Reputation Ramp Up is Fast Track Marketing's review management program for medical practices. It brings in fresh reviews from your patients, keeps track of what's being said about you online, responds for you, and puts your best reviews in front of the people deciding where to book.

HIPAA compliant from start to finish

What the program does

Review Generation

More reviews from real patients

After their visit, patients receive an automatic email or text message inviting them to share their experience. Requests go out on their own, so new reviews keep coming in without your staff having to ask.

Review Monitoring & Management

Know what's said, and answer it

We monitor many review sites for new reviews of your practice and respond to every one, positive or negative. Happy patients get a thank-you, and concerns get a thoughtful reply instead of sitting unanswered.

Review Marketing

Put your best reviews to work

Your top reviews are automatically posted to your website, a custom review microsite, and your social media. A steady stream of fresh reviews also supports how your practice shows up on Google.

154

new Google reviews in under a year for an ophthalmology practice that started Reputation Ramp Up with zero. They now hold a **4.2 star average**.

Pricing

$600
one-time setup, up to 3 locations
($200 per additional location)

$200 /mo
per location
